

Abir Mahmood

US Citizen | am14384@nyu.edu | linkedin.com/in/abir-mahmood1 | 646-683-2949

Education

New York University (NYU)

Expected Graduation: December 2026

Bachelor's Degree in Computer Science (Major GPA: 3.667 / 4.00)

- **NYU POISE Scholarship Recipient:** 1 of 4 selected for the competitive NYU POISE full scholarship

Experience

Software Engineer Intern

May 2026 – Present

Dockware

Tulsa, OK

- Building customer-facing dashboards and mobile scan applications for warehouse robotics systems, mentored by SpaceX engineers
- Developing full-stack features across the client-facing product suite, including real-time data visualization and fleet monitoring interfaces
- Designing and implementing configuration management tooling to support scalable deployment of computer vision systems across robot fleets

Data & Workflow Automation Intern

Jan 2026 – May 2026

Cyber Skills Center

Tulsa, OK

- Built a **Google Apps Script** pipeline to auto-categorize Coursera learner data into dynamic views (active, inactive, at-risk), eliminating **~4 hours/week** of manual data entry.
- Building a **React + Tailwind CSS** dashboard integrating **Airtable API** to replace manual weekly status meetings with a real-time, self-serve view of learner KPIs (completions, hires, at-risk flags).
- Wrangled and validated **300+ learner records** — resolving duplicates and missing values — to ensure data integrity powering automated categorization and reporting workflows.

Software Engineer Intern

Jun 2023 – Sep 2023

SPEAKHIRE

Remote

- Implemented matchmaking algorithm to pair students with mentors using React and TypeScript, driving a **+62% increase in matches**
- **Built dashboard from 0 to 1** using React MUI and TypeScript, providing school administrators with actionable insights into the efficacy of the mentorship program
- Transformed raw attendance data from 50+ mentoring sessions into **interactive visualizations** on the website by integrating D3.js, enhancing data presentation and user understanding of attendance trends

Projects

🔗 Internal Dashboard for TCC Skills Lab (Private) — React, Vite, Tailwind CSS, Airtable, Google Apps Script, Vercel

- Built and deployed a full-stack internal analytics dashboard for a 4-person team tracking 100+ learners across multiple Coursera workforce programs, replacing fragmented spreadsheet workflows; automated the data pipeline via Google Apps Script scheduled triggers and regex-based file detection, reducing a 6-step manual CSV workflow to a single file upload
- Developed a multi-source merging pipeline consolidating 3 Coursera CSV exports, deduplicating learner records by email, classifying engagement status, and serving live data to the React frontend through a custom Apps Script JSON API

🔗 NoteStack — Live Demo — MongoDB, Express.js, React, Node.js, Render

- Built and deployed a full-stack notes management web application using the MERN stack with secure CRUD operations, JWT authentication, and a responsive UI; developed modular RESTful APIs with authentication middleware, input validation, and structured error handling.
- Deployed on Render with MongoDB Atlas, utilizing Git/GitHub for version control and continuous iteration.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C, C++, HTML, CSS, SQL **Databases:** MongoDB, PostgreSQL, MySQL

Frameworks & Libraries: React, Node.js, Express.js, Next.js, D3.js **Specialties:** MERN Stack, RESTful API Design, Responsive Web Applications

Developer Tools: Git, GitHub, VS Code, Postman, Figma, Docker (basic), Unity (basic)
