

Abir Mahmood

US Citizen | am14384@nyu.edu | linkedin.com/in/abir-mahmood1 | 646-683-2949

Education

New York University (NYU)

Expected Graduation: December 2026

B.A. in Computer Science (CGPA: 3.5 / 4.00)

- **NYU POISE Scholarship Recipient:** 1 of 4 selected for the competitive NYU POISE full scholarship

Experience

Software Engineer Intern

May 2026 – Present

Dockware

Tulsa, OK

- Building internal MLOps tooling to support scalable deployment of computer vision systems across robot fleets
- Developing configuration management and deployment tools for internal infrastructure
- Designing and implementing customer-facing dashboards to surface insights from robotics systems

Data & Workflow Automation Intern

Jan 2026 – May 2026

Cyber Skills Center

Tulsa, OK

- Built a **Google Apps Script** pipeline to auto-categorize Coursera learner data into dynamic views (active, inactive, at-risk), eliminating **~4 hours/week** of manual data entry.
- Building a **React + Tailwind CSS** dashboard integrating **Airtable API** to replace manual weekly status meetings with a real-time, self-serve view of learner KPIs (completions, hires, at-risk flags).
- Wrangled and validated **300+ learner records** – resolving duplicates and missing values – to ensure data integrity powering automated categorization and reporting workflows.

Software Engineer Intern

Jun 2023 – Sep 2023

SPEAKHIRE

Remote

- Implemented matchmaking algorithm to pair students with mentors using React and TypeScript, driving a **+62% increase in matches**
- **Built dashboard from 0 to 1** using React MUI and TypeScript, providing school administrators with actionable insights into the efficacy of the mentorship program
- Transformed raw attendance data from 50+ mentoring sessions into **interactive visualizations** on the website by integrating D3.js, enhancing data presentation and user understanding of attendance trends

Projects

🔗 NoteStack — Live Demo — MongoDB, Express.js, React, Node.js, Render

- Built and deployed a **full-stack notes management web application** using the **MERN stack**, implementing secure **CRUD operations**, JWT authentication, and a fully **responsive UI**.
- Developed modular **RESTful APIs** with authentication middleware, input validation, and structured error handling to ensure scalability and reliability.
- Deployed on **Render** with MongoDB Atlas and utilized **Git/GitHub** for version control and continuous project iteration.

🔗 Road Test Simulator | 📺 | C#, Unity

- **Led a team of four** to develop a comprehensive road test simulator in C and Unity, addressing the need for an effective training tool by designing realistic environments, interactive road signs, traffic signals, and dynamic scenarios
- Oversaw the implementation of advanced features like **AI-controlled vehicles** and **pedestrian simulations**, improving user experience with real-time feedback and customizable driving conditions, resulting in a **20% increase** in user engagement and a **15% improvement** in project efficiency

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C, C++, HTML, CSS, SQL

Frameworks & Libraries: React, Node.js, Express.js, Next.js, D3.js

Databases: MongoDB, PostgreSQL, MySQL

Developer Tools: Git, GitHub, VS Code, Postman, Figma, Docker (basic), Unity (basic)

Specialties: MERN Stack Development, RESTful API Design, Responsive Web Applications
